Survey Data Analysis

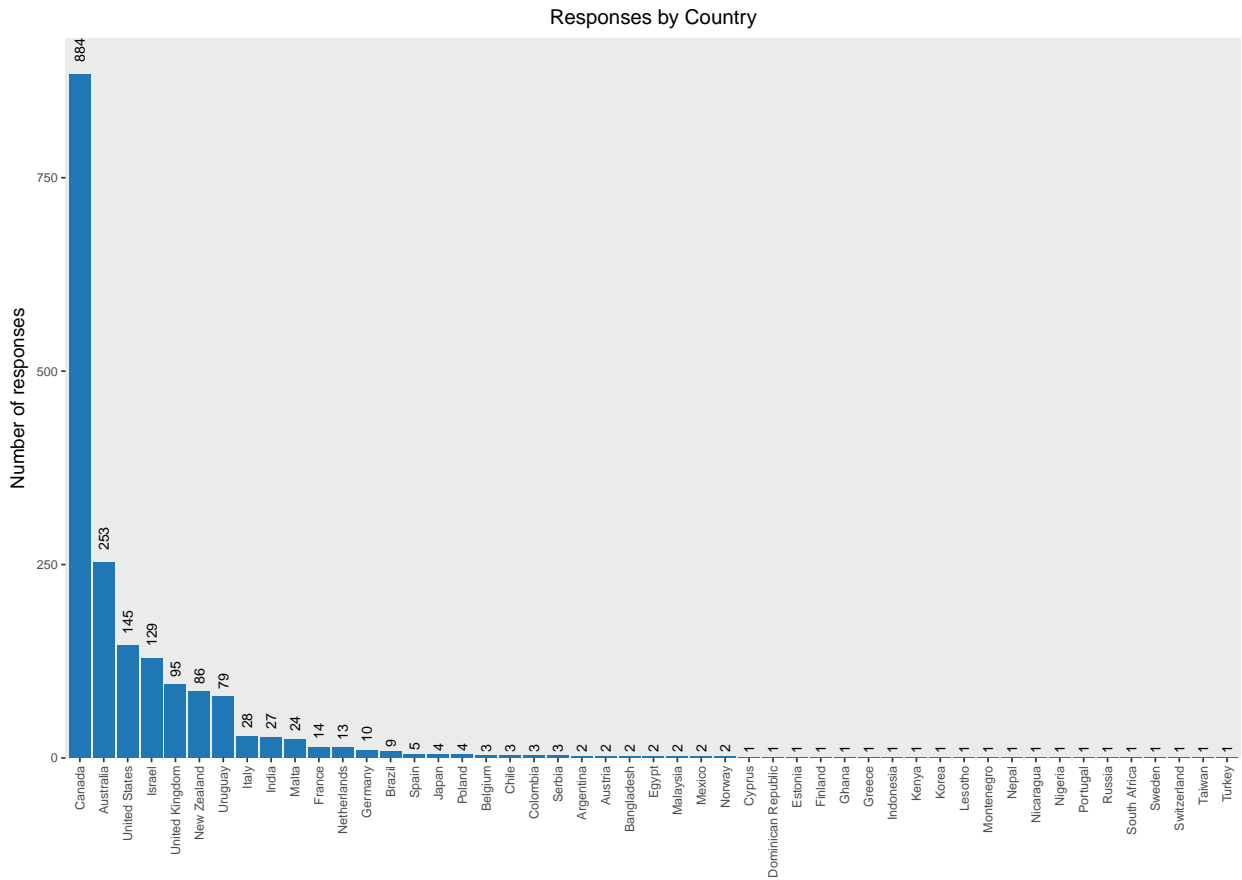

Note that numbers not all the same because respondents did not always answer every question

Results

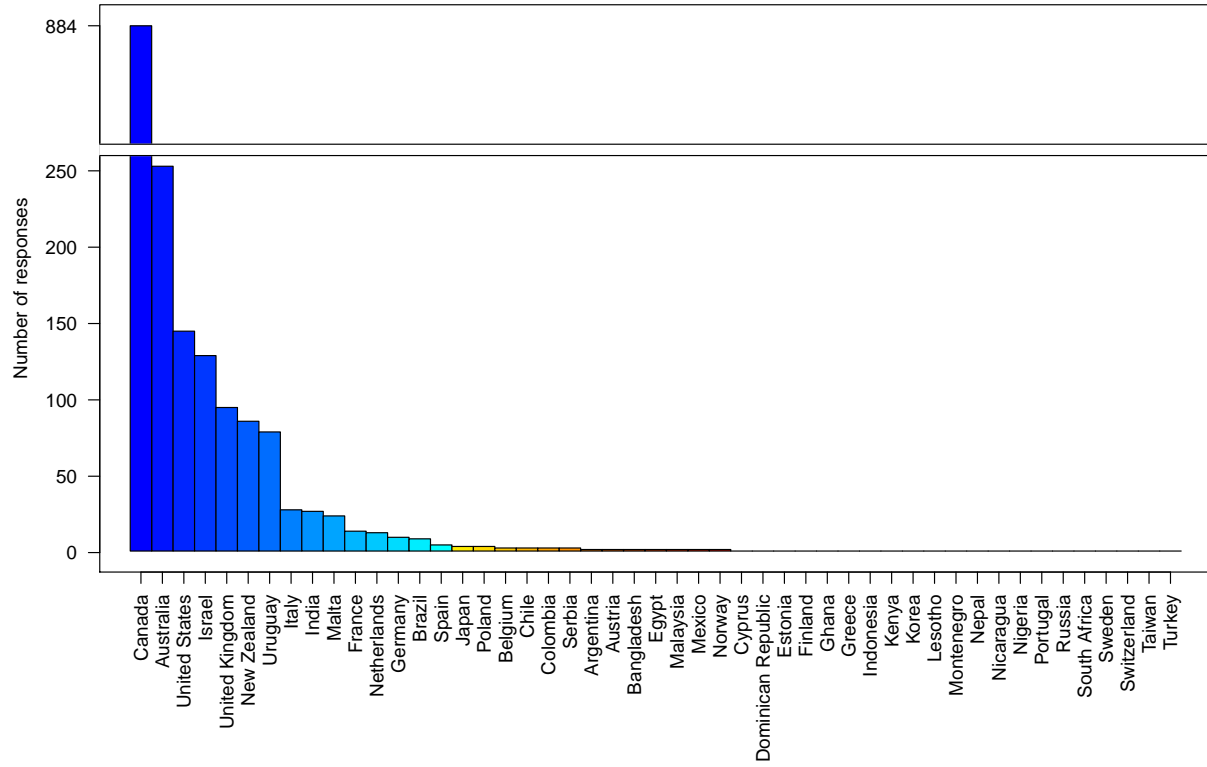

In total, 1860 researchers completed the online survey. Of these, almost xxxxx were male (76%) and xxxxx were female (24%); xxxx proportion either did not input their gender or selected other. 98 we senior academics and 2 were senior non academics.

Researchers from many different disciplines were represented in the survey. 54 percent of responses came from either the natural or physical sciences (Figure 4.2). The remaining responses were spread amongst the medical and life sciences (24%), engineering (10%), interdisciplinary research (6%), and social sciences and humanities (6%).

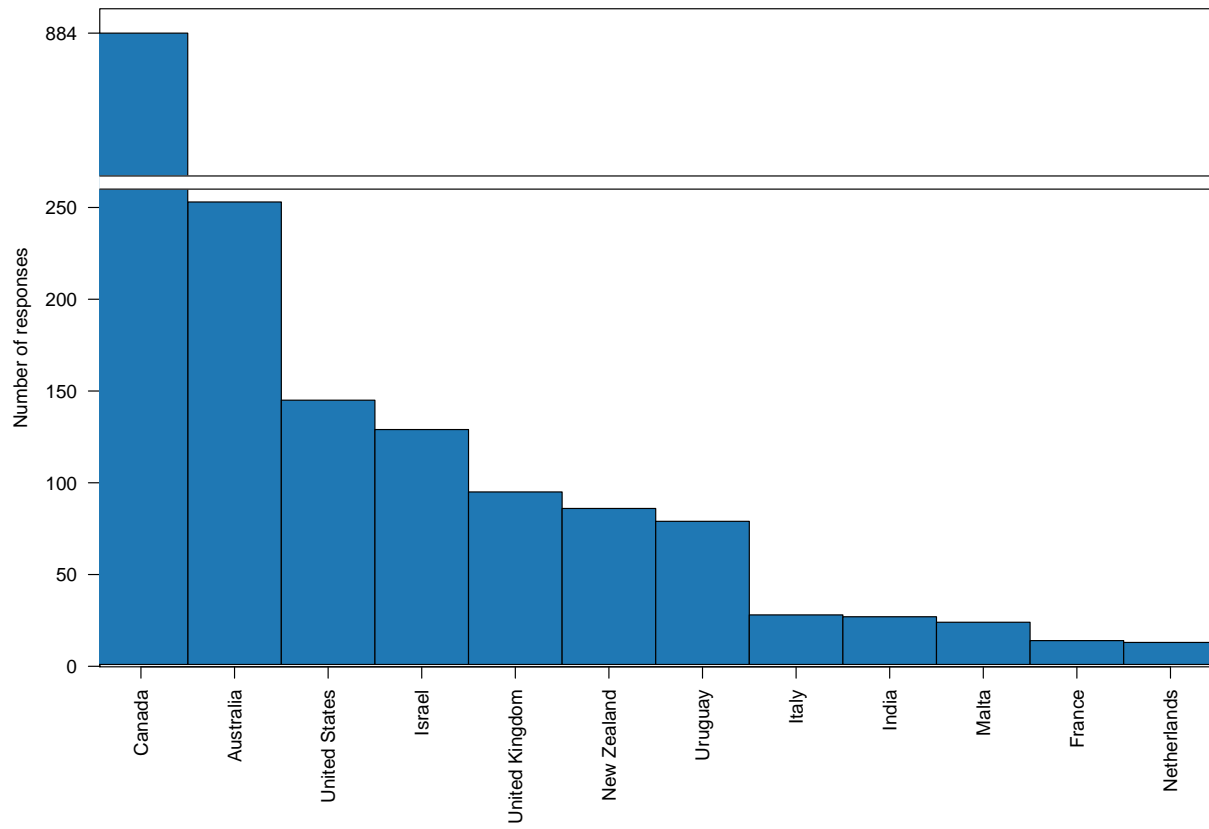

Figures of number of responses by country (these are also saved as individual PDFs)
